

Akshay Kungiri

Senior WordPress Engineer

👤 Profile

Results-driven WordPress Software Developer with **7 years of experience** specializing in **high-performance WordPress solutions**, **plugin development**, **theme development** and **enterprise-scale optimizations**. Proficient in **PHP**, **WordPress**, **MySQL**, **JavaScript**, **React**, **SCSS**, and **REST API development**. Passionate about open-source contributions, AI-driven WordPress innovations, and improving editorial experiences through automation. Actively attending WordPress meetups, events and contributions.

💼 Employment History

Sr. WordPress Engineer L3 B at Multidots, Ahmedabad, India

May 2023 — Present

- Developed and maintained **high-traffic websites** for large enterprise clients using **React**, **WordPress**, **PHP**, **JavaScript**, **jQuery**, **SCSS**, **REST API**, improving load times by **50%**.
- Experienced in **remote work for two years** and currently working as a remote developer.
- Developed **custom Gutenberg blocks** with intuitive **layout and design settings**, enabling the client's marketing team to easily edit pages directly from the WordPress editor. Ensured that all block settings are **user-friendly and accessible**, allowing editors with **no development experience** to make modifications effortlessly.
- Implemented **performance optimization techniques** such as **minifying scripts and styles**, **lazy loading**, **compression**, **caching**, and **asset optimization**.
- Implemented **web accessibility best practices** to ensure compliance with **WCAG 2.2 (Web Content Accessibility Guidelines)**, enhancing website usability for all users, including those with disabilities.
- Translated **design mock-ups** from Figma, Adobe XD, and Adobe Photoshop into **pixel-perfect, responsive web pages**.

Sr. WordPress Developer at Yudiz Solution, Ahmedabad, India

March 2022 — April 2023

- Developed pages with integrating libraries such as **WOW.js**, **Slick.js** and **Three.js**.
- Integrated **third-party** APIs into WordPress websites, enhancing backend functionality and user experience.
- Collaborated** with the design team to **align project objectives**, utilizing **ACF** to create **custom themes** and **templates** from scratch.
